The Crossings of Colonie Town Park

Colonie, New York

This new 130-acre town park includes meadows, wetlands and extensive wooded and wildflower areas. All are connected by over six miles of multi-use trails that wind across the natural landscape. We designed the buildings around the classic upstate New York farm complex theme.

Buildings house meeting rooms, park offices, crafters booths, a multipurpose room, maintenance facilities, and a large entertainment gazebo that overlooks the pond.
