

## Sundowner Dining - SUNY Plattsburgh

Plattsburgh, New York

architecture+ designed the renovation of Sundowner Dining, one of three main dining halls on Campus. The facility seats 300 and serves an average of 1,600 meals per day. The project was initiated to allow the College to remain competitive with student recruitment and retention by offering more attractive and appealing dining spaces. We converted the existing servery into a contemporary, open food court configuration with an improved seating area and multiple seating options.
